

# HYDROVACUUM

## Battery powered vacuum pump

This battery-operated vacuum pump allows hydraulic interventions without emptying the tank

- ① TIME SAVINGS
- ② STAND-ALONE SYSTEM
- ③ PRACTICE
- ④ CONTROLLABLE
- ⑤ ROBUST AND EASY TO TRANSPORT

**No more unnecessary oil changes!**

## APPLICATIONS

During hydraulic interventions on vehicles, thanks to the Hydrokit vacuum pump, you no longer need to empty the oil tank, thanks to the creation of an air vacuum. It has the added advantage of operating with an 18V / 20V battery. This means that there is no need to connect to the vehicle's battery, which is sometimes difficult to access.

This product has been developed for power tool batteries: Bosch, Milwaukee, Makita, Hikoki / Hitachi, Lincoln, Stanley, Hydrokit\*.

\*Hydrokit grease gun battery

## PRODUCT ADVANTAGES

- **Time saving:** no more emptying the tank
- **Autonomous system:** runs on a power tool battery
- **Practical:** no more oil leaks during work
- **Controllable :**
  - Vacuum control by pressure gauge and vent valve
  - Visual control of battery capacity and audible end of battery indicator
- **Robust and easy to transport:** delivered in a Hydroclips® case

## TECHNICAL SPECIFICATIONS

- Autonomous power supply by power tool battery  
(choice of battery, see table below)
- Battery autonomy: 30 minutes to 1h30 (depending on battery capacity)
- Power supply by clamp on 12V vehicle battery, cable length 8m
- Electrical power of the vacuum pump: 75W
- Maximum relative vacuum: 770 mbar
- Air flow rate: 34 l/min
- Spiral hose length: 4m
- Vacuum visualization by manometers with graduation from - 1 to 0 bar
- 3 position switch :  
off - power tool - on external power supply
- Case with storage compartments (Hydroclips range case)
- Case size: L 442 x W357 x H151 mm
- Supplied with 80 mm diameter magnetic end cap and smooth end caps
- Visual and audible battery life indicator : 4 LEDs
  - 1 beep every 12 seconds → about 10 minutes left
  - 3 beeps every 2 seconds → about 2 minutes left
